Zodwa's Nightmare

Just before this CD was completed in January 2005, a fire broke out at the AGAPE orphanage. Fortunately nobody was hurt but the main building was destroyed and deemed uninhabitable by the fire department. The children are now homeless and the need for helping them is even greater then before.

Plan has been drawn up to rebuild and expand the center before fire as conditions were already cramped. The new plans for AGAPE contain eight mini homes each catering for eight children and a house mother. It would house 64 children from the local community.

By buying this CD you have contributed towards making Zodwa's dream a reality. ALL proceeds will be donated to help children of the AGAPE orphanage.

You can help make a difference!
